

Technical Quick Guide

Logistics Operational Guide

Download a pre-packaged LOG and install it on USB-stick/pen-drive (or on your computer or external drive)

You can download the LOG and take it with you on your **PC, Netbook, USB Key or other storage device**. It is advisable to **update** the off-line version every time you have an Internet connection to ensure that you have the latest information.

How to download the LOG?

There are two different ways of installing the LOG:

1

First option to download the LOG: PORTABLE version

1. Open your usual browser, type <http://log.logcluster.org/portable.html>
2. Select 'DOWNLOAD' on the home page
3. In the Download pop up, double click on the file and Run it.
4. Install the folder in a location of choice (computer, pen drive, external hard drive, etc)
5. Enter the PortableLOG folder
6. Click on "LOG Portable" to launch

You will now be able to browse the LOG in offline or online mode.

To update the LOG, connect to the Internet, go to the Home page and click the "Update" button. The downloading process is completed when all progress pages (xx/xx no. of pages) are finalized.

2

Second option to download the LOG: FIXED version on your computer, within your browser.

To have the off-line version of the LOG directly available in your browser using Google GEARS.

1. Open your browser, type: <http://log.logcluster.org/>
2. Scroll to the end of the Home page. The system will indicate if you need to install Google GEARS.
 - If GEARS is already installed on your computer, go to point 4.
 - If GEARS is not installed in your browser, click the button and follow the process to install GEARS (agree Terms of use and save it).
3. In the Download pop up, double click on Gears.exe, accept it, click Run and restart your browser.
4. At the bottom of the LOG home page, Enable Gears and confirm the request with "I trust this site".
5. Click on the "Update" button.
6. The LOG will now be downloaded. This is completed when all progress pages (xx/xx no. of pages) are finalized.
7. Save website <http://log.logcluster.org/index.html> as a **bookmark/default** homepage and access it from your browser in online or offline mode.

This Technical Quick Guide provides information and guidance on the following technical questions:

- How to download the LOG? Portable version (preferred) or fixed in browser
- How to update the LOG?
- How to download diagrams?
- How to navigate within the LOG?

How to update the LOG?

Internet access is required!

Go to the LOG Portable browser to update the LOG on your portable storage device (USB, hard disk, etc) and click "Update"

OR

Go to your browser and type <http://log.logcluster.org> Scroll to the bottom of the page and click "Update"

1

2

How to navigate within the LOG

The LOG functionalities are similar to a website. At the top of each topic, the path of your location is shown (Eg: "You are here: Home → Response → Transport").

To navigate, each "location" can be clicked.

To go one step back, the "Back" button can be clicked.

To search for information on specific topics/words/terms, go to the right top of the page and use the 'search' box.

Please note that:

In offline mode, access to external websites linked to the LOG is not possible.

How to download diagrams?

To download a diagram, 'right click' on the visual and choose 'Save Image As' from the menu

OR

In the next version of the LOG an additional option will be provided. Then it will be possible to go to the annexes of a topic or to the library to find the diagrams available for download.
